## FAIR ENERGY TRANSITION FOR ALL

“Advancing a fair transition by linking Innovation, Policy, and People”

“*If only one is left behind, there is no fairness*” – Giulia, Italy (2020)

[www.fair-energy-transition.eu](http://www.fair-energy-transition.eu)

---

### Why It Matters

Across Europe, too many people are struggling with the rising cost of energy and mobility. In 2023, over **10% of Europeans** couldn't afford to keep their homes warm. Others are being priced out of basic transport. As the EU pushes forward on climate action, there's a growing risk: that vulnerable citizens will be left behind — undermining both social cohesion and the energy transition itself. We must make the green transition work for everyone.

---

### What is FETA?

**Fair Energy Transition for All (FETA)** is a Europe-wide initiative launched by a group of philanthropic foundations. From 2020–2023, it gathered insights from **1,000+ vulnerable citizens** across the EU on how to make climate and energy policies more inclusive.

Now, in **Phase 2**, we're moving from listening to action — finding and making visible local solutions across the EU, supporting cities and communities to turn those ideas into sustainable success stories and facilitating EU wide mutual learning.

---

### Our Approach

#### 1. Scaling What Works

Up to **10 local projects** will be selected through a participatory process including vulnerable citizens' assessment. These projects will be supported through a “**project escalator**” — a tailored programme focusing on three objectives: to help them grow (“scaling up”), connect (“mutual learning”), and influence change (“replication”).

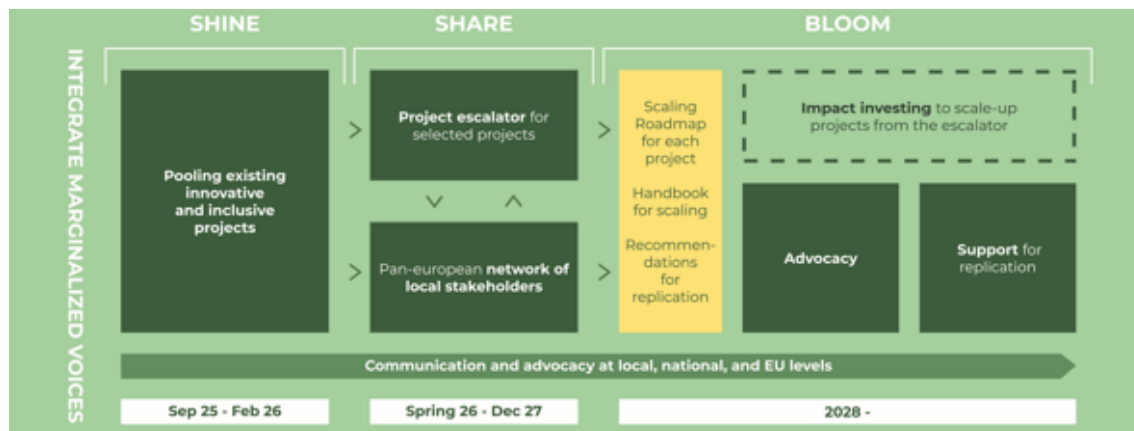

## 1. Build a Pan-European Network

We'll bring together **80+ local stakeholders** — city officials, NGOs, social services, civil society — to share knowledge, visit pilot projects, and inspire the application of inclusive housing and mobility solutions.

## 2. Keep Vulnerable Citizens at the Heart

Insights from vulnerable citizens will guide every step. We'll help policymakers and practitioners build their capacity to include these voices in both planning and implementation.

### Project Timeline

 **Autumn 2025** – Open call for flagship projects

 **2026–2027** – Project escalator & stakeholder network

 **2028** – Launch replication call & FETA Handbook for Scaling and Replication

## Who's Involved?

- **King Baudouin Foundation** (coordination, advocacy)
- **Schneider Electric Foundation** (strategic and funding partner)
- **ifok** (methodology, network, communication)
- **Genio** (scaling support, inclusion)
- **Energy Cities** (innovation & escalator management)
- **Eurocities** (policy & local connections)
- **NEF** (financial management)
- **Local country partners** (outreach & logistics)

---

## Why Partner With Us?

Join us to:

- Champion a **fair, inclusive energy transition**
- Support local actors** across Europe
- Help scale real solutions for **housing and mobility equity**
- Ensure that **no one is left behind**
